

HiR SCOPE OF WORK

Horizon Insight Research

Who We Are

Horizon Insight Research is a data and information research organization dedicated to helping institutions make informed, evidence-based decisions through reliable, high-quality data solutions. We focus on transforming data into actionable insights that support development impact, organizational effectiveness, and sustainable growth.

What We Do

We specialize in collecting, processing, analyzing, and interpreting data to transform raw information into meaningful insights. Our work supports strategic planning, program effectiveness, performance measurement, and evidence-driven decision-making for organizations operating in dynamic and resource-challenged environments.

Our Target Clients

Our primary focus is supporting local NGOs, government institutions, and community-based organizations operating in Turkana. We help strengthen their programs through accurate data collection, research insights, and comprehensive monitoring and evaluation support, enabling informed decision-making and sustainable community impact.

Our Services

- Data collection (field surveys, digital data capture, monitoring systems)
- Data analysis and interpretation
- Research reporting and data visualization
- Monitoring, Evaluation, and Learning (MEL) support
- Data management and organizational data systems

Our Value Proposition

Horizon Insight Research ensures that data is properly structured, classified, secured, and transformed into a strategic organizational asset. We:

- Accelerate evidence-based decision-making
- Enhance operational efficiency by reducing errors and redundancy
- Support regulatory compliance, transparency, and accountability
- Facilitate advanced analytics to improve program impact and stakeholder engagement
- Manage the full data lifecycle, from collection and cleaning to storage, governance, and visualization

Through our expertise, organizations gain actionable insights that improve performance, optimize resources, strengthen accountability, and drive sustainable growth and development impact.

Horizon Insight Research — Visibility & Establishment Strategy

Current Organizational Focus

At this stage, Horizon Insight Research aims to establish itself as a credible and visible data research organization. Our priority is to build recognition, trust, and professional presence by demonstrating expertise through practical work, partnerships, and knowledge sharing, particularly among NGOs, government institutions, and community-based organizations operating in Turkana.

Understanding Stakeholder Data Needs

To ensure relevance and impact, Horizon Insight Research will continuously identify the types of data and information most needed by NGOs, government institutions, and community-based organizations. This involves understanding their priority sectors, funding requirements, reporting obligations, and programmatic challenges so that our research directly supports their operational and strategic goals.

Key Areas NGOs and CBOs Often Require Data On

Many NGOs and CBOs require reliable data to support project design, funding proposals, monitoring and evaluation, and impact reporting. Common focus areas include health, education, livelihoods, climate resilience, food security, gender equality, youth empowerment, water and sanitation, migration, and community development. Baseline studies, needs assessments, beneficiary feedback data, and impact evaluations are particularly valuable.

Government Data Priorities

Government institutions often require data for policy development, planning, service delivery improvement, and accountability reporting. Priority areas may include population demographics, economic development indicators, public health statistics, education outcomes, infrastructure needs, environmental sustainability, social protection programs, and regional development trends. Aligning research with national and county development priorities increases opportunities for collaboration.

Strategic Approach to Data Alignment

To remain relevant, Horizon Insight Research will regularly review sector priorities, development plans, donor focus areas, and emerging community challenges. This ensures that

The logo for Horizon Insight Research is a large, faint watermark in the background. It features a circular emblem on the left containing a stylized sun or gear with a central dot. To the right of the emblem, the words "HORIZON", "INSIGHT", and "RESEARCH" are stacked vertically in a large, bold, sans-serif font.

our studies, data collection activities, and research outputs address real needs and provide actionable insights for decision-makers, strengthening partnerships and positioning us as a trusted research partner.

Build Credibility Through Visible Work

Conduct Studies & Data Collection

Undertake research studies and data collection projects addressing local development challenges and produce evidence-based insights that stakeholders can use for planning, funding, and program improvement.

Develop High-Quality Case Studies

Document measurable successes from projects by clearly highlighting the client or community challenge, our data-driven approach, and the tangible impact and outcomes to demonstrate practical value and build confidence among potential partners.

Publish Original Research

Produce reports on niche development issues, local trends, and sector-specific insights in Turkana to position Horizon Insight Research as a thought leader while increasing visibility and credibility.

Create Public-Facing Data Tools

Develop simple dashboards, templates, or data tools that organizations can use freely to showcase technical capability while providing immediate value.

Maintain Strong Data Integrity

Ensure accuracy, consistency, confidentiality, and reliability in all data processes because trust in data quality is central to long-term recognition and partnerships.

Proactive Outreach & Networking

Targeted Professional Engagement

Connect with NGO, government, and CBO decision-makers through professional platforms like LinkedIn and share insights relevant to their programs rather than direct sales messaging.

Offer Introductory Value

Provide free workshops, short trainings, or data audits to local organizations to demonstrate expertise while building relationships.

Participate in Sector Events

Attend development forums, research discussions, and stakeholder meetings with a focus on learning, networking, and visibility rather than immediate business.

Strategic Positioning & Partnerships

Position as a Local Data Expert

Highlight deep contextual understanding of Turkana's development landscape and emphasize localized knowledge that larger organizations may lack.

Collaborate with Complementary Organizations

Partner with consulting firms, NGOs, communication agencies, or development practitioners to cross-promote services and expand reach.

Thought Leadership Contributions

Publish articles, blog posts, or guest contributions on relevant development or research platforms to enhance visibility and authority.

Strengthen Digital Presence

Professional Online Visibility

Develop a clear, informative website showcasing services, research, and impact while maintaining consistent branding across all platforms.

Content Sharing

Share insights, short reports, data tips, and research updates regularly with a focus on educational value rather than marketing language.

Engage in Professional Communities

Participate in online forums, research groups, and sector discussions to build authority organically.

Start Small to Demonstrate Value

Pilot Projects & Pro Bono Work

Undertake smaller projects with high potential impact to build a strong portfolio, testimonials, and referrals.

Focus on Demonstrable ROI

Clearly communicate how data insights improve program effectiveness, reduce costs, strengthen funding proposals, and enhance community outcomes.

Three-Month Visibility Action Plan

Phase 1 Foundation (Months 1–3)

Conduct at least one visible study or data project, publish initial research outputs, build portfolio and case studies, strengthen online presence and branding, and establish partnerships and networking channels.

Phase 2 Outreach Expansion (Post-3 Months)

Begin structured outreach to approximately 40 NGOs and government organizations and about 60 community-based organizations, submitting tailored proposals that highlight data-driven value and focus on long-term collaboration.

Strategic Goal

To position Horizon Insight Research as a trusted data partner in Turkana by demonstrating expertise, delivering reliable insights, and building strong relationships with development organizations.

Humanitarian–Development Nexus in Kakuma and Kalobeyi

The overarching priority among actors in Kakuma and Kalobeyi is advancing the **humanitarian–development nexus**, transitioning from emergency aid to sustainable integration, self-reliance, economic inclusion, and shared services for both refugees (over 300,000 people) and host communities. This shift is taking place amid **aid reductions, recurrent droughts, and evolving policy frameworks**, emphasizing durable, community-centered solutions.

Role of NGOs

UNHCR coordinates approximately **12–15 implementing partners** and over **30 operational partners**. Major NGOs and their focus areas include:

- **Danish Refugee Council (DRC):** Community protection, livelihoods, peacebuilding, and refugee-host integration.
- **Finn Church Aid (FCA):** Primary and secondary education, skills training, youth empowerment, and peace and rights advocacy.
- **Humanity and Inclusion (HI):** Disability inclusion, rehabilitation, mental health and psychosocial support, and service accessibility.
- **International Rescue Committee (IRC):** Health and nutrition, protection including gender-based violence and child protection, women's empowerment, and emergency response.
- **Jesuit Refugee Service (JRS):** Secondary and vocational education, psychosocial support, peace education, and community integration.
- **Kenya Red Cross Society (KRCs):** Emergency relief, health services, disaster risk reduction, and community resilience.
- **Lotus Kenya Action for Development Organization (LOKADO):** Local peacebuilding, conflict resolution, natural resource management, and refugee-host coexistence.
- **Lutheran World Federation (LWF):** Primary education, teacher training, community services, and protection.
- **Peace Winds Japan (PWJ):** Water, sanitation, hygiene (WASH), infrastructure development, and environmental sustainability.
- **Refugee Consortium of Kenya (RCK):** Legal aid, asylum support, protection, and gender-based violence advocacy.
- **Salesians of Don Bosco – Kenya (DBK):** Youth vocational training, child protection, and recreational programming.

- **FilmAid Kenya (FAK):** Communication for development, awareness campaigns, and community media.
- **Norwegian Refugee Council (NRC):** Accelerated learning, livelihoods, shelter, and camp management support.
- **Windle International Kenya (WIK):** Higher education scholarships, teacher development, and youth skills training.
- **Plan International:** Child protection, girls' education, and gender equality initiatives.
- **Other partners** such as BOMA, World Vision, and Terre des Hommes focus on livelihoods, resilience, child protection, and nutrition.

Many NGOs are aligning programs with the **Shirika Plan**, emphasizing **shared and host-inclusive services** in education, health, and livelihoods.

Role of Government Organizations

Government entities focus on **coordination, policy implementation, and transitioning services** under the Shirika Plan, launched in 2025. This plan aims to integrate refugee settlements into municipal systems and reduce aid dependency by approximately 2035. Key actors include:

- **Turkana County Government:** Leads service integration across health, education, water, agriculture, and infrastructure, supports host community development, and manages Kakuma's municipal transition, including urban planning and shared facilities.
- **Department of Refugee Services (DRS):** Manages refugee registration, asylum processing, camp coordination, peaceful coexistence, and Shirika Plan implementation in partnership with UNHCR and NGOs.
- **Kenya Medical Training College (KMTC):** Trains the health workforce and integrates refugee health services into national systems.
- **National Health Insurance Fund (NHIF):** Expands health coverage to refugees and host communities for universal access.

- **Other national agencies:** Provide security, integrate national curricula in schools, and support sectoral service delivery.

Government priorities emphasize **systems strengthening, integrated services, human capital development, climate resilience, economic growth, and durable solutions** consistent with the Shirika Plan pillars.

Role of Community-Based Organizations (CBOs)

Over **60 refugee-led CBOs** operate in Kakuma and Kalobeyei, playing a critical role in filling service gaps, particularly amid aid reductions. They focus on **community-driven, localized solutions**, often partnering with NGOs and UNHCR. Key examples include:

- **Resilience Action International (RAI):** Youth empowerment, digital and entrepreneurship training, and advocacy aligned with SDGs.
- **Action for Refugee Life (AReL):** Digital skills, entrepreneurship, education pathways, and self-reliance initiatives.
- **Kalobeyei Initiative 4 Better Life:** Food security and nutrition through innovative community agriculture.
- **Single-mother and women-led initiatives:** Economic empowerment, garment production, digital literacy, childcare support, and small business development.
- **Other CBOs** such as She Can Initiative, United Safe Environment, Voice for Disabled People, and Good Deeds CBO provide protection, gender-based violence response, psychosocial support, advocacy, livelihoods, youth engagement, and community mediation.

Common trends across CBO work include addressing **education gaps, nutrition challenges, protection needs, economic resilience, and peaceful coexistence**.
